

IN THE CLAIMS:

1. (Newly amended) ~~An improved~~ telescopic leg ladder assembly having two extendable leg assemblies, said legs assemblies further comprising:  
interior legs and larger hollow exterior legs, said interior legs snugly fitting into the larger exterior legs and being extendable from the exterior legs by a threaded screw mechanism, said screw mechanism allowing the interior legs to be extended independently of one other.
  
6. (Newly amended) A telescopic leg ladder assembly as claimed in Claim 1 wherein the interior legs and the exterior legs have a plurality of holes to be aligned with each other when extending the interior leg; and further having a securing metal pin to be mounted through an aligned pair of holes in the exterior leg and the interior leg to secure the extended legs.
